

CORTEX BRAIN

The company brain your existing agents query.

ONE-PAGER / 2026 / CORTEXBRAIN.AI

IN FIFTY WORDS

ONE COMPANY BRAIN.

Cortex captures spoken decisions, structures them, and makes them queryable on demand by the agents, LLMs, and tools a company already pays for. Conscience governs the pathways between nodes, deciding what information travels, to whom, and why.

THE NUMBER WE PUBLISH

FRESH IN FIFTEEN MINUTES.

Sources are polled on a fifteen-minute cycle. Per-document freshness latency is instrumented as p50/p95 histograms on every release, so the figure is measured rather than asserted.

THE BOUNDARY

NOT ANOTHER PUBLIC ENDPOINT.

Capture-agnostic ingest, deterministic extraction, a decision graph, and headless access over MCP. The result is governed infrastructure that remains in the company boundary.

OPERATING SURFACE / 01

ONE SIGNED IMAGE. FOUR MOVING PARTS.

01 / CAPTURE INGEST		02 / RECORD DECISION GRAPH	
03 / GOVERN CONSCIENCE		04 / SURFACE MCP ACCESS	

The surfaces change; the record and its policy boundary remain intact.

DEPLOYMENT

RUN IT WHERE IT STAYS.

The same build runs inside your VPC, in managed cloud, or on a certified appliance on your floor. Open-weight models operate inside the boundary; sync is outbound-only.

DESIGN PARTNERS / EARLY ACCESS

BUILD A GOVERNED COMPANY BRAIN.
